

**Dev Sangha National School Deoghar**  
**Commemorating International Day for the Preservation of the**  
**Ozone Layer**  
**16th September 2024**

Every year on September 16, the whole world celebrates World Ozone Day. This day is dedicated to highlighting the importance of protecting and preserving the ozone layer in our atmosphere. The ozone layer is located about 15-35 kilometres above the Earth's surface and plays a vital role in blocking harmful ultraviolet (UV) rays from the sun.

If the ozone layer weakens or is depleted, it can affect both our environment and health. Therefore, it is our responsibility to protect it.

Every year the United Nations Environment Programme (UNEP) sets a new theme for Ozone Day, which outlines the priorities and challenges of that year. The theme for 2024 is 'Montreal Protocol: Advancing Climate Action'.

The Eco Club of Dev Sangha National School organized some competitions on this occasion to make them aware of the challenges being faced to save the ozone layer and also how science and technological innovations are helping to solve this problem.

- *'Plant sapling programme' by pre primary and Primary section students.*
- *'Slogan Writing' on the topic 'Save the Ozone layer'- for Class 6 (all section)*
